

AREA ONE: PROBLEM SOLVING TOGETHER

6 Stop looking at how YOU would solve the problem and start looking at how the problem should be solved.

7 Let the NATURAL strengths on the team take the lead when problem solving together.

8 Our strengths can become a weakness if taken to an extreme.

9 When our conversation becomes too emotional objectiveness can be lost.

10 An aggressive person tends to have a short fuse and be quick to anger, while a reflective person will tend to have a long fuse and be slow to anger.
